# "The Power of Intelligent Vision"

FocusVO

Detect. Decide. Defend, Instantly

The Eye of Future Security

Mr. Sumiit Katyal

FocusVU for Indian Railways, Metros, Rail Transport, etc

Overview

FocusVU.ai is a next-generation AI-powered video surveillance platform designed to eliminate human dependency, reduce false alarms, and deliver actionable insights in real time. For Indian Railways, the platform offers a suite of smart surveillance capabilities across critical operational domains — ensuring safety, efficiency, and compliance across stations, workshops, warehouses, infrastructure zones, and rolling stock areas.

1. RAILWAY PLATFORMS

Problem Statement

- High footfall zones with elevated risk of intrusion, pickpocketing, unattended luggage, and crowd surges
- Manual surveillance is limited in coverage and prone to fatigue
- Delayed response to human intrusion near tracks, resulting in fatal accidents

AI-Powered Solution Table

Area	No. of Cameras	Key Features
Entry/Exit Gates	4	Face Recognition, Entry Analytics
Platform Zone	8	Crowd Density Alerts, Unattended Object Detection
Track Edge Monitoring	6	2m Radius Intrusion Alert, Human vs Bird/Object Filtering
Ticket Counters	2	Queue Management, Panic Gesture Detection
Command Center	1	Centralized Monitoring Dashboard, Alert Prioritization

Advantages

- Real-time alerts for high-risk behaviour
- Prevents track-related incidents
- Data-backed crowd control
- Visual analytics for operational planning

ROI & Metrics

- Reduction in security manpower by 50%
- ROI achieved in 10–12 months
- False alarms reduced by >90%

2. RAILWAY WORKSHOPS

Problem Statement

- Risk of unauthorized access to maintenance bays, electrical rooms, and heavy equipment zones
- No mechanism for ensuring PPE compliance
- Lack of traceability during accidents or mishandling

AI-Powered Solution Table

Zone	No. of Cameras	Key Features
Entry Gates	2	Face Recognition, ID Mapping
Maintenance Bays	6	Helmet/PPE Detection, Unauthorized Entry
Equipment Storage	4	Object Movement Tracking, Theft Alerts
Loading/Unloading Areas	2	Activity Analysis, Vehicle Detection

Advantages

- Worker safety enforcement
- Asset tracking and accountability
- Incident video logs for internal audits

ROI & Metrics

- Equipment misuse incidents reduced by 70%
- Improves compliance with safety norms
- Annual savings in lost tools/equipment: ₹5–7 lakhs/workshop

3. RAILWAY INFRASTRUCTURE (TRACKS, YARDS, SIGNALING CABINS)

Problem Statement

- Vulnerable open zones prone to intrusion, sabotage, or trespassing
- No visibility in remote signal cabins and switches

AI-Powered Solution Table

Location	No. of Cameras	Key Features
Signal Cabins	2	Intrusion Alert, Activity Logging
Open Yards	6	Perimeter Security, Object Detection
Track Junction Points	3	Tampering Alerts, Real-Time Streaming

Advantages

- Early warning of sabotage or tampering
- Remote monitoring of critical infra
- Reduced operational delays

ROI & Metrics

- Theft incidents reduced by 60%
- Improved uptime in switch operations
- Visual data for incident analysis and RPF coordination

4. RAILWAY WAREHOUSES

Problem Statement

- Lack of round-the-clock monitoring of goods
- Inventory theft or misplacement
- No loading/unloading process verification

AI-Powered Solution Table

Area	No. of Cameras	Key Features
Entry/Exit Gates	2	Face Recognition, Vehicle Number Logging
Storage Bays	6	Object Movement, Shelf Tampering Detection
Loading Docks	3	Video Verification, Anomaly Detection

Advantages

- Video proof for inward/outward transactions
- Loss prevention through predictive alerting
- Data for audit and claim disputes

ROI & Metrics

- Shrinkage reduced by 40–50%
- Reduced pilferage loss
- Improves warehouse efficiency by 20–25%

5. PANTRY CARS & RAILWAY CATERING UNITS

Problem Statement
- No visibility into hygiene practices
- Theft or wastage of food inventory
- Unauthorized kitchen access

AI-Powered Solution Table

Zone	No. of Cameras	Key Features
Kitchen Area	2	Hygiene Compliance, Hairnet/PPE Detection
Inventory Storage	2	Spoilage/Tampering Alerts
Delivery Points	2	Time-Based Monitoring, Access Logs

Advantages

- Hygiene audit readiness
- Digital food handling traceability
- Better control of wastage and supplies

ROI & Metrics

- Hygiene violations reduced by 60%
- Cost savings in supply chain: ₹3–4 lakhs/unit/year
- Improves IRCTC audit scores and customer confidence

Conclusion
FocusVU.ai empowers Indian Railways to digitize safety, security, and operational efficiency through AI-enabled surveillance. Our modular approach ensures seamless integration with existing infrastructure and scalable rollout across zones.
